

CGT Logistics & Warehousing

“Cell and gene therapy provides the science - now for the logistics”

GMP and GDP compliant, we offer scalable solutions across our logistics and warehousing for cell and gene therapy, pharmaceutical, and biotech industries. Our short lead time and high-quality service make us the ideal partner for any organisation.

Extensive Warehousing

Guaranteed capacity to meet small to large demand. We also offer cleanrooms for qualified kitting for forward sterile manufacturing. If required, we can provide third-party laboratory services.

Temperature-controlled storage

We offer temperature-controlled storage including controlled ambient, 2-8, -20. Minus 80 degrees and liquid nitrogen available upon request and subject to project specific timelines. Real-time compliance is enabled by our 24-hour continuous temperature monitoring. Regardless of the conditions, we provide the perfect temperature-controlled transport solution.

Flexible transport solutions

Supporting the fast-growing and time-sensitive demands of the cell and gene therapy sector with just in time delivery available, utilising our fleet of electric vehicles.
