

Regulatory Support

Site of Importation

Central Pharma has great depth of experience in providing expert regulatory advice and regulatory support. We have a history of developing strategies to effectively meet your immediate and long-term product or company regulatory requirements.

Service Overview:

- ✓ Licence submissions, variations and renewals
- ✓ Ongoing licence maintenance
- ✓ Regulatory strategy: Advice on UK, EU, US legislation
- ✓ GMP/GDP gap analysis & audit
- ✓ Stability & shipping studies

Regulatory Support

We offer regulatory support for our customers providing guidance and potential solutions to regulatory hurdles. We are experienced in handling a wide range of therapeutics areas and project types. Customers are provided with a tailored regulatory package based on their requirements and timescales and are then assigned a team that will work with them accordingly.

Dedicated Project Management

Our regulatory services include providing a dedicated account manager to guide you through each project from concept to delivery. Your account manager will be involved in every aspect of the project, from batch record preparation, managing logistics, to answering technical queries.

Transport & Distribution

Our group of approved and audited transport providers can support all of your transport and distribution requirements. Our vendors are GMP and GDP certified and can handle shipments requiring specific temperature conditions, including ambient, 2-8, -20, -80 degrees and liquid nitrogen. We offer same-day delivery that ensures time-critical items arrive on site ready to be processed to meet stringent manufacturing process timelines.

Procurement

Central Pharma regularly manages purchasing and inventory of packaging materials and other stock items on behalf of our customers. This service is underpinned by our expert network of manufacturers, suppliers, distributors and logistics providers, each of whom have been audited and approved by our QA team. We provide full traceability of goods, from receipt through to processing or dispatch.

QP Batch release (including release for sale)

Our QP regulatory support ensures that your product is available on the market quickly and effectively, certifying that it has been manufactured to the highest standards.

Our experts help customers navigate the complex and evolving regulatory environment to ensure your product is imported and released correctly.
